ABOUT

Certified Data Analyst with over 8 years of experience in financial reporting, digital performance analytics, and business intelligence, recently completing the Advanced Data Analysis and Visualization (3MTT Programme). Adept at transforming complex raw data into actionable insights using Power BI, Excel, and SQL, leveraging a strong accounting background to drive data-driven decision-making and optimize business performance. Proven ability to enhance efficiency and deliver impactful analytical solutions.

WORK

Accountant | Data Analyst

Smart-P Digital World

Feb 2016 - Jun 2024, Jos, Plateau State, Nigeria

Led comprehensive data collection, analysis, and reporting initiatives to enhance financial and campaign performance, contributing to strategic business optimization.

- Collected, cleaned, and meticulously analyzed diverse financial and campaign performance data, providing foundational insights for strategic decision-making.
- Developed and deployed interactive dashboards using Power BI and Excel, enabling management to monitor key performance indicators and campaign effectiveness in real-time.
- Conducted rigorous A/B testing and performance analysis on marketing campaigns, identifying actionable opportunities to optimize strategies and improve engagement.
- Identified critical customer behavior trends and engagement patterns through advanced data analysis techniques, informing targeted marketing efforts and product development.
- Automated recurring financial and operational reports using advanced Excel functionalities, significantly reducing manual reporting time by an estimated 20% and improving overall efficiency.
- Delivered data-driven insights that directly improved campaign performance and reduced operational inefficiencies, contributing to more effective resource allocation and higher ROI.

PROJECTS

Dynamic Power BI Dashboard Development

Developed dynamic Power BI dashboards to analyze sales, performance metrics, and key performance indicators (KPIs), providing visual insights for business decision-making.

Excel-Based Reporting System Design for Small Businesses

Designed and implemented Excel-based reporting systems tailored for small businesses, addressing their need for structured recordkeeping and efficient data management.

Relational Database Analysis and Business Reporting with SQL

Developed and executed complex SQL queries for relational database analysis, generating critical business reports and insights.

Data Analytics Portfolio Management and Publication

Managed and published various data analytics projects on GitHub and other portfolio platforms, showcasing technical skills and analytical capabilities.
